

Be the First to Experience Biamp's Product & Acquisition News at ISE

Making their world debuts at ISE 2020, our latest solutions offer expanded functionality for enhanced performance in 2020 and beyond... **including innovations from the newest member of the Biamp family, HRT Srl.**

- **TesiraCONNECT TC-5D**, expanding this connection point's functionality to allow designers to incorporate Dante devices within room designs
- **Crowd Mics Online**, an expansion of our revolutionary technology that allows remote participants to engage in an event as if in the same room as the presenter
- **Tesira 3.15**, the latest software update that includes Event Scheduler for streamlined event creation and process automation
- **TEC-X control pads**, which enable easy programming for presentation spaces and conference rooms via highly intuitive touch capabilities
- **Vocia software and firmware updates** that allow for infinite length live paging and include enhanced security updates for authenticating third-party audio files
- **Community LVH-900 Beamforming Venue Horn**, which provides the most consistent coverage of any large format point source loudspeaker while also being fully arrayable
- **PREZONE2**, a multi-functional stereo preamplifier that allows users to independently control music source selection and volume in two stereo zones, while also supporting two microphones that mix with up to four stereo sources
- **P30DT**, A smaller footprint, lower cost version of the existing P60DT pendant loudspeaker engineered for retail and hospitality environment

- Biamp is thrilled to announce that it has **agreed to acquire Huddle Room Technology Srl (HRT)**, the inventor of and leader in wireless USB technology that powers its products and improves the user experience in BYOD spaces
- **Huddle Hub** allows devices to connect to room peripherals, without any physical connection, to display content, launch applications, or collaborate with the UC meeting platform of choice
- New at ISE, **Huddle Hub Enterprise** is a corporate cloud-based version of Biamp HRT's collaboration technology, which enables the creation of Smart Rooms that exist as permanent virtual meeting places
